Institute name in English, Town, Country

Abstract
Each paper should be preceded by a short abstract of not more than 150 words, which should be written as a single paragraph and should not contain references.

1 Section heading
A section title is styled as above, and first paragraphs after headings are not indented. References appear in numerical order [1, 2]. An itemized list looks like the following:

– the first item,
– the second item.

You can also have an enumerated list:

1. the first item,
2. the second item.

1.1 Subsection heading
As you see, the first paragraph is not indented. References when part of the text use the term ‘Ref.’, for example, see Ref. [1] and Refs. [3–6].

Subsequent paragraphs are indented. See Table 1 for an example of how to display a table.

Table 1: A simple table

<table>
<thead>
<tr>
<th>Heading</th>
<th>Result 1</th>
<th>Result 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>200 kVp X-rays total*a</td>
<td>3.25</td>
<td>1.79</td>
</tr>
<tr>
<td>200 kVp X-rays (primary)</td>
<td>2.60</td>
<td>1.48</td>
</tr>
</tbody>
</table>

*a Notes in tables appear as this one here.

1.1.1 Subsubsection title
Equation (1) is presented correctly:

\[
n^k(h) = kh \frac{k}{32}.
\]

(1)

This is how all equations should be formatted, including Eqs. (2)–(10), which are not shown\(^1\).

1.1.1.1 Subsubsubsection title
Figure 1 is an example of how to display figures. Please refer to figures as Figs. 2–4, etc. Section 1.1.1 is a cross-reference to a section. See the document describing the CERN reports [7] for more details on how to present figures, tables, equations, and much more with \LaTeX.

Examples of references and a bibliography follow the acknowledgements.

∗On leave from another institute somewhere.

\(^1\)Footnotes are to be used only when absolutely necessary.
Acknowledgements
We wish to thank A.N. Colleague for enlightening comments on the present topic.
